

QAD On Demand: The ERP SaaS Solution

QAD On Demand is a web-based, software as a service (SaaS) solution that provides a flexible deployment alternative for QAD Enterprise Applications.

QAD On Demand helps ERP customers reduce total cost of ownership and dramatically simplify the management of QAD Enterprise Applications. Our Software as a Service (SaaS) offering relieves IT management of the uncertainty, risk and often unpredictable expense surrounding delivery, maintenance and upgrades of mission-critical applications. QAD On Demand meets the needs of customers of all sizes from SMB to large enterprises, and provides QAD customers with infrastructure, operations, integration and application management support alternatives.

The Value of QAD On Demand

- Reduce Risk
- Achieve Fast Return On Investment
- Leverage Proven Experience
- 24x7 Global Support
- 24x7 Manufacturing Expertise

QAD On Demand Industry Editions

Tailored to meet your needs:

“Alpine is achieving rapid growth and expansion of our business through a combination of organic growth and acquisitions. QAD On Demand provides us with a comprehensive system, that can integrate new acquisitions and joint ventures rapidly. It enables us to continue operating as a lean and efficient team that can focus our time and talent on Alpine Biomed’s long-term, strategic vision. And, because of QAD’s industry acumen for the life sciences marketplace, we were able to implement the ERP system very quickly.”
