QAD TAM Technical Reference Change Summary

Product Name Changes

Starting in September 2019, the new name for QAD's complete portfolio of products is QAD Adaptive Applications. Additionally, QAD Adaptive ERP is the new name for QAD's flagship ERP solution. QAD Adaptive ERP includes the functionality previously associated with QAD Cloud ERP and QAD Enterprise Applications - Enterprise Edition, plus the QAD Enterprise Platform and Adaptive UX which resulted from the Channel Islands program. Going forward, the terms QAD Enterprise Applications, QAD Cloud ERP, and Channel Islands will be deprecated but will remain in previous documentation and training materials. QAD's intention is to—as soon as possible—eliminate the use of the deprecated terms going forward.

Change Summary

The following table summarizes significant differences between this document and previous versions.

Date/Version	Description	Reference
March 2021/3.0	Updated database definitions based on latest schema	page 6
May 2018/ 2.3	Rebranded	--
November 2017/ 2.2	Initial Release	--

About This Guide

This book is intended for system administrators and programmers doing software conversions and custom programming.

This book contains TAM Database Definitions and Entity Relationship Diagrams.

QAD TAM Database Definitions 3

QAD TAM Entity Relationship Diagrams 79

QAD TAM Database Definitions

This chapter contains the database definitions for QAD TAM.

Introduction **4**

Symbols and Conventions **4**

Database Definition Tables **6**

Introduction

See “Symbols and Conventions” for symbols.

Database tables are grouped by module and listed alphabetically, with the following information.

Claim Claim table				
Field Name	Label	Col-Label	Format	Dec
AgreementCurrencyCode	Agreement Currency		x(3)	
BuyingGroupCode	Buying Group Code	Buying Group	x (20)	2
ClaimAgreeAmount	Claim Amount in Agreement Currency		->>, >>>, >>>, >>9.99<	10

- *Field Name*. The name of the field.
- *Label*. The field label as it appears on screens.
- *Col-Label*. The column label that appears on reports.
- *Format*. How, and what kind of, data can be displayed.
- *Dec*. The maximum number of decimal places that can be stored.

Some fields in the database are not currently used. These fields are either:

- User definable for custom programming
- Reserved for future use by QAD
- Obsolete (only used in earlier versions)

Each database table has at least one index. By default, Progress sorts and retrieves records using the primary index, which is indicated by an asterisk (*). Indexes have the following attributes.

Index-Name	Uni	Field-Name	Asc	Abbr
BuyingGroupCode	yes	DomainCode	yes	no
		BuyingGroupCode	yes	no
* BuyingGroupID	yes	BuyingGroupID	yes	no
		LinkToCreditorID	yes	no
LastModifiedDateTime	no	LastModifiedDateTime	yes	no

- *Primary Index*. Indicated with an asterisk. The most frequently used index. Each table has one and only one primary index. Progress uses the primary index when retrieving records or ordering records for a list (like a report) if you don't specify another index. The primary index reflects the most common order, or the most natural order, by which records are sorted.
- *Index Name*. The name of the index.
- *Uni (Unique)*. Yes indicates only one record in the table can have a particular index value.
- *Field Name*. Each index has one or more field components.
- *Asc (Asc)*. Yes indicates that records are ordered and accessed by ascending field values.
- *Abbr (Abbreviated)*. For character data fields, a sort option that examines partial records. Tables with abbreviated indexes sort faster but require more disk space.

Symbols and Conventions

The following symbols are used in this book.

Symbol	Meaning
*	Primary Index
!	Shows where a column label wraps to next line

The following conventions are used in this book.

Convention for Designating Fields	Meaning
[x]	Extent of array field
<prefix>__user<number>	User field (ac__user1)
<prefix>__dec<number>	User decimal data field (ac__dec01)
<prefix>__chr<number>	User character field (ac__chr01)
<prefix>__qad<number>	QAD reserved field (ac__qad01)
<prefix>__x<number>	Obsolete field (ac_xctr)

QAD TAM Entity Relationship Diagrams

This chapter includes diagrams that detail key relationships among various tables in the TAM database.

Introduction **80**

Entity Relationship Diagrams **82**

Introduction

This chapter details major relationships between tables in a QAD TAM database. These diagrams are designed to help:

- Programmers interested in customizing or modifying the standard system. The diagrams show relationships that must be preserved in any customization or modification.
- Programmers writing queries or custom reports. The diagrams show which tables can be joined and the field specifications required to make them join. Note that all possible table relationships are not shown, just the major ones.
- Administrators interested in the availability of custom reports. The diagrams show which reports you can prepare.
- Users of Progress Results who want to determine the relationships available for reporting.

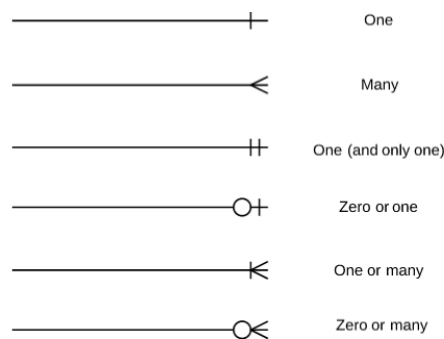

These diagrams are meant to be used in conjunction with TAM Database Definitions; see “QAD TAM Database Definitions” on page 3.

Symbols and Conventions

In a relational database, each table is a self-contained collection of data about a single thing (or *entity*). There are six notation styles that can be combined to distinguish specific entity relationships.

The six notation styles are displayed in Figure 2.1

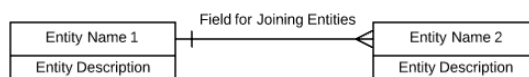

Fig. 2.1
Notation Style Description

A bar symbol (|) indicates an OR relationship when more than one field can be used for joining.

Relationships are identified by using the notations, as shown in Figure 2.2.

Fig. 2.2
Table Relationship Description

Relationship Examples

Figure 2.3 shows that one and only one claim can have one or more claim deals and that one claim deal has one and only one claim.

Fig. 2.3

Claim to ClaimDeal Relation Example

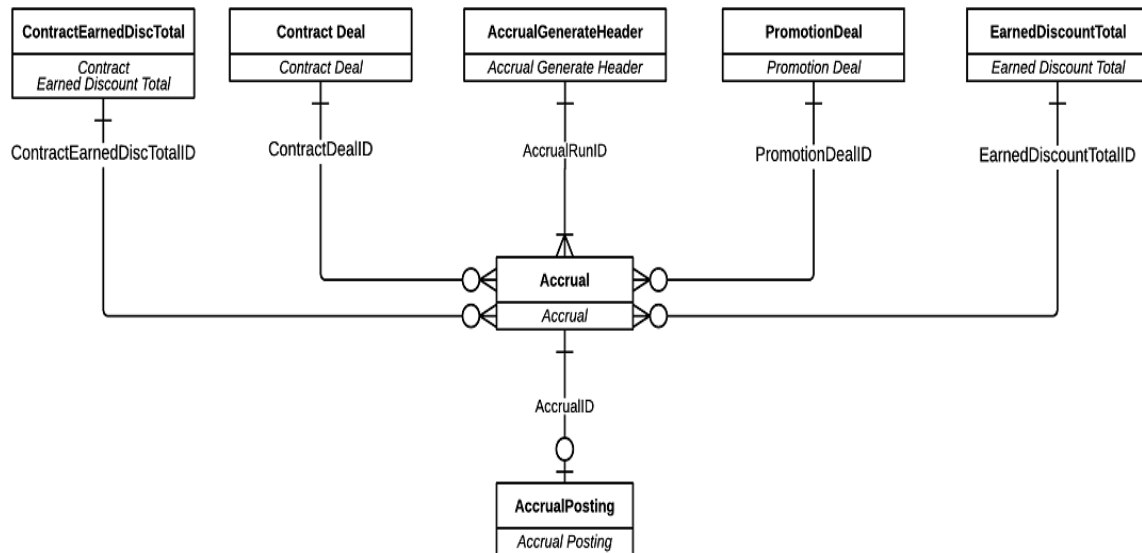

The claim and claim deal entities are joined with the claim deal ID.

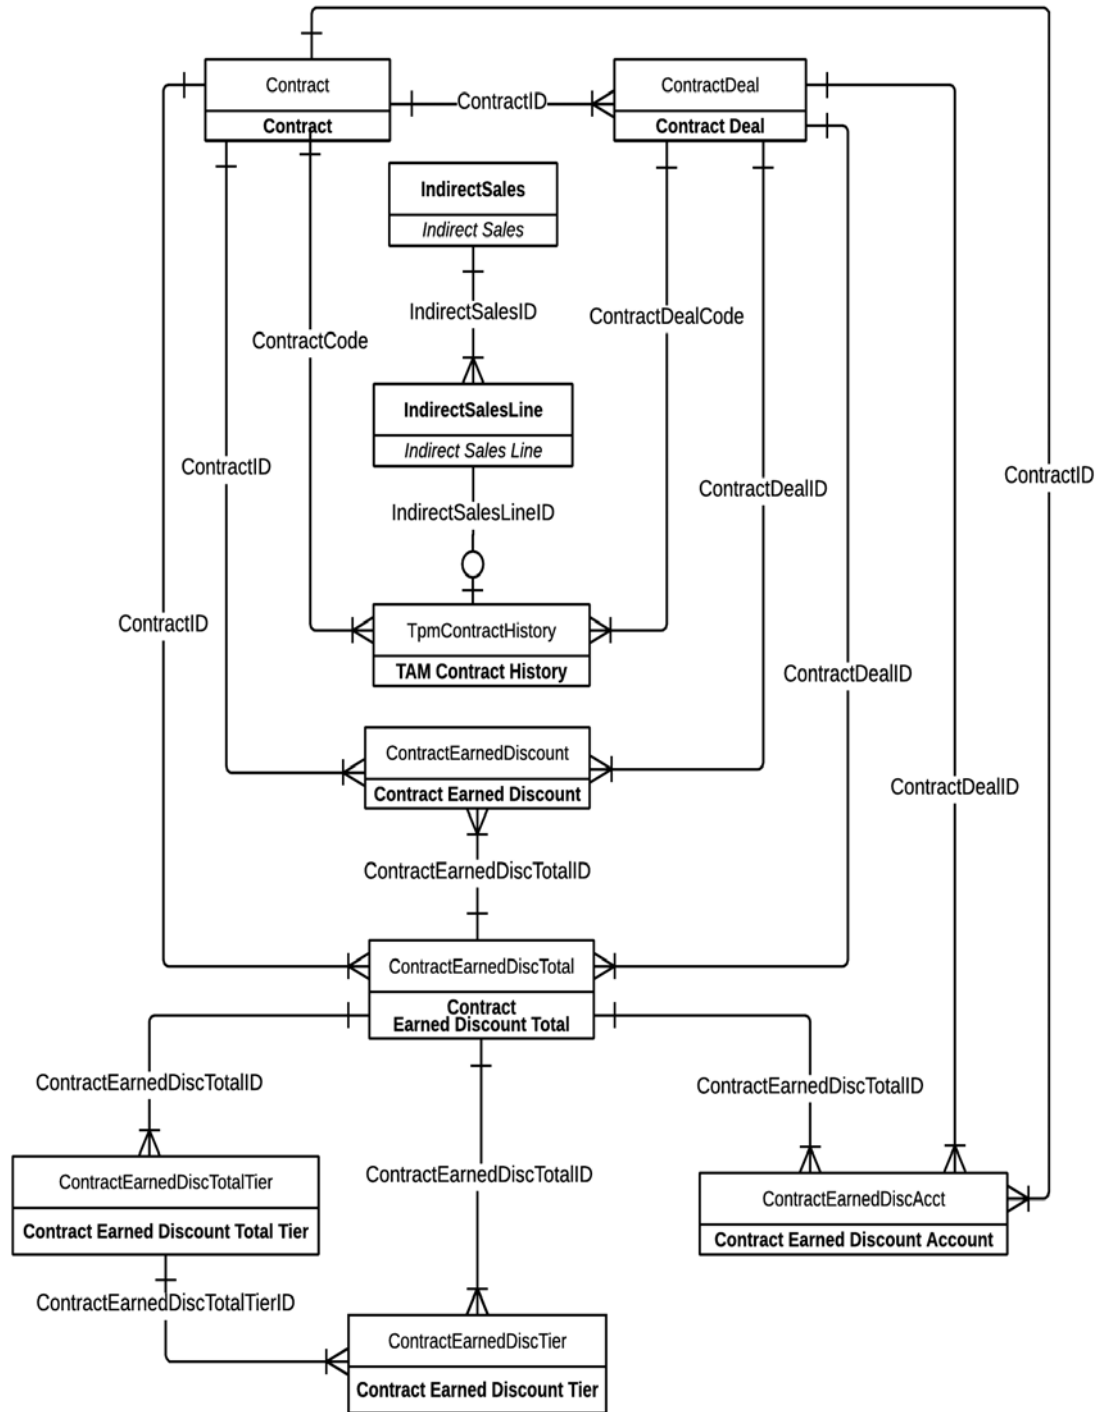

The diagrams are organized alphabetically and shown starting on the next page.

Product Information Resources

QAD offers a number of online resources to help you get more information about using QAD products.

[QAD Forums \(community.qad.com\)](https://community.qad.com)

Ask questions and share information with other members of the user community, including QAD experts.

[QAD Knowledgebase \(knowledgebase.qad.com\)*](https://knowledgebase.qad.com)

Search for answers, tips, or solutions related to any QAD product or topic.

[QAD Document Library \(documentlibrary.qad.com/\)](https://documentlibrary.qad.com/)

Get browser-based access to user guides, release notes, training guides, and so on; use powerful search features to find the document you want, then read online, or download and print PDF.

[QAD Learning Center \(learning.qad.com\)*](https://learning.qad.com)

Visit QAD's one-stop destination for all courses and training materials.
