Revision History

(updates to the document since the last publication are highlighted)

Document Date & Version	Updated by	Comments
9th Oct 2023, 22	pue@qad.com	QAD GTTE v20.3 release.
13th Feb 2023, 21	pmu@qad.com	QAD GTTE v20.1 release. The End of Support (Archive) dates updated for multiple versions. The v2009 column was removed from the Product Version Compatibility section.
30th Sept 2022	pmu@qad.com	QAD GTTE v20.0 release.
8th Oct 2021	pmu@qad.com	QAD GTTE v19.0 release.
31st Mar 2021	pmu@qad.com	QAD Precision GTTE v18.2 release. Update policy to include End of Support phase. All QAD Precision major releases prior to v2012 R00 will end support on 1st April 2022.
26th Feb 2021	pmu@qad.com	Updated Progress OpenEdge compatibility for v17.x.
23rd Oct 2020	pmu@qad.com	QAD Precision GTTE v18.1 Oracle database release.
15th June 2020	pmu@qad.com	Correction to Application Server (Progress OpenEdge ABL) Support Platforms for v18.1 & v18.0.
29th May 2020	pmu@qad.com	QAD Precision GTTE v18.1 release.
14th Feb 2020	pmu@qad.com	Rebranded for QAD Precision Global Trade & Transportation Execution (GTTE), removed references to TMS. QAD Precision GTTE v18.0 release. Added a summary of components in each release.
5th April 2019	pmu@qad.com	v17.3 is now supported on Windows Server 2016. Correction of retirement dates for overall PRECISION releases (v16.1 to v17.3) and Web UI (5.2 to 6.3)
11th March 2019	pmu@qad.com	Added PRECISION v17.3 (Web UI 6.3, TMS S42, FBAP 2.0, Win UI R06) Removed references to versions of - PRECISION prior to v2009 - Web UI prior to v4.0 - PRECISION TMS prior to vS30 - Germany customs integration (Atlas) prior to vR05. Removed PEM as it is covered under Web UI releases.
29th June 2018	pmu@qad.com	Added PRECISION v17.2 (Web UI 6.2, TMS S41, FBAP 1.0, Win UI R06)

QAD Global Trade and Transportation Execution Product Lifecycle and Compatibility Guide

2nd April 2017	pmu@qad.com	PRECISION v17.0 release (Web UI 6.0, TMS S41, Win UI R06) Web UI 5.2
20th May 2016	pmu@qad.com	PRECISION v16.1 release (Web UI 5.1, TMS S40, Win UI R05)
1st Sep 2015	pmu@qad.com	PRECISION v16.0 release (Web UI 5.0, TMS S39, Win UI R04, ATLAS 9.1) Removed TRAX v5.1 column from product version compatibility tables.
9th Jan 2015	pmu@qad.com	Web UI 4.10
31st March 2014	pmu@qad.com	PRECISION / QAD TMS 2012 R01
29th Nov 2013	pmu@qad.com	TMS S37, TMS S36 releases
25th Sept 2012	pmu@qad.com	PRECISION 2012 R00
27th July 2012	pmu@qad.com	Web UI 4.5
1st Nov 2011	pmu@qad.com	PRECISION 2009 R01
5th August 2011	pmu@qad.com	Web UI 4.4.3
29th April 2011	pmu@qad.com	Web UI 4.2 & 4.3 Release
1st Sep 2010	pmu@qad.com	New format

Introduction

This document outlines the product development and support resources available for the life span of QAD Global Trade and Transportaiton solution.

There are two releases per year. It details the different product stages from release to eventual retirement: in so doing, it provides the lifecycle status for each QAD GTTE product. This information is designed to help you develop your product plans utilising your knowledge and understanding of QAD's product lifecycle plans. To assist you with migration and transition strategies, QAD offers a consulting service.

Please be advised that the information contained in this document is subject to change without notice. For further information, please contact your QAD representative or visit <https://support.qad.com/>.

This document does not address QAD's future product plans.

Lifecycle Phases and Definitions

General Availability (GA)

The products are made available on supported platforms when they have passed quality approval process. It may have gone through a Early Adopter / Beta program.

It is recommended that customers begin new projects with GA Phase products. Furthermore, they should migrate existing applications to GA Phase products as soon as possible.

The QAD Precision R&D team remain actively assigned to the product version until the release has reached the 'functionally stable' phase.

Service Packs and fixes are made available on a regular basis.

GA phase products are evaluated for certifications on new operating environments.

Functionally Stable

Functionally stable products are fully supported but generally do not receive new features.

Any issues/bugs reported within the product version will be fixed and made available on a case- by- case basis; furthermore, they will be included in Service Pack Releases for supported platforms on a regular basis.

Issues that have been reported and fixed in later products will be reviewed, and will be made available where there is a compelling business case.

If circumstances preclude a customer from moving to a later version of the product, modifications or workarounds may be provided to the customer.

Functionally stable phase products will be evaluated for certifications on new operating environments.

Mature

Mature Phase products do not receive new features, and support services may become limited.

Customers can continue to deploy existing applications for Mature Phase products. However, QAD Precision recommends that customers begin planning to move to newer product versions once their product version has reached this phase.

Mature Phase products will not be evaluated for certifications on new operating environments.

Due to the advanced age of Mature Phase products, a limited Support service is available. Using the knowledge and skills acquired for this product version, we will provide commercially viable solutions for the resolution of customer issues and queries. However, the knowledge/skills level required to resolve issues on Mature Phase products is not guaranteed.

Issues reported within the product version will be fixed, where possible, and made available on a case-by-case basis; from time to time, they may also be included in Service Pack releases. These releases will, however, be less frequent than during the previous phase.

If circumstances preclude a customer from moving to a later product version, modifications or workarounds may be provided to the customer on a chargeable basis.

Issues that have been reported and fixed in later product versions will be reviewed and possibly made available upon specific customer request.

We strongly recommend that customers migrate to GA Phase products as soon as possible in order to maintain the highest level of support for their applications and systems.

Retired

Products placed in the Retired Phase are not available for sale, except for the purchase of additional user counts for existing licenses.

Customers should not continue to deploy applications with Retired Phase products.

Retired Phase products will not be evaluated for certifications on new operating environments.

Issues reported within the product version will be fixed and made available on a case-by-case basis; however, no Service Packs will be made available.

Issues that have been reported and fixed in later product versions will be reviewed and made available, upon specific customer request. However, Precision reserves the right to charge for such changes.

QAD GTTE Lifecycle Phases Overview

QAD Precision suggests and supplies possible migration paths and migration tools for Retired Phase products. Migration assistance will be available on a consultancy basis.

Since different product versions have varying system requirements, it is important to consider operating system and hardware requirements when evaluating your migration options.

Support aims to provide commercially viable solutions for customer issues and queries on Retired Phase products licensed under Support Service maintenance contracts. However, the knowledge/skills level required to resolve issues on Retired Phase products is not guaranteed.

QAD Precision strongly recommends that customers migrate to GA Phase products as soon as possible in order to maintain the highest level of support for their applications and systems.

End of Support (Archive)

Products placed in the End Of Support Phase are not available for sale, or for the purchase of additional user counts for existing licenses.

End Of Support Phase products will no longer be supported by standard maintenance.

Customers should not continue to deploy applications with End Of Support Phase products.

No further updates to the Product version will be made, and no new Service Packs will be made available.

End Of Support Phase products will not be evaluated for certifications on new operating environments.

End Of Support Phase products are no longer Supported by standard maintenance.

QAD Precision suggests and supplies possible migration paths and migration tools for End Of Support Phase products. Migration assistance will be available on a consultancy basis.

Since different product versions have varying system requirements, it is important to consider operating system and hardware requirements when evaluating your migration options.

Support aims to provide commercially viable solutions for customer issues and queries on End Of Support Phase products licensed under Support Service maintenance contracts. However, the knowledge/skills level required to resolve issues on End of Support Phase products is not guaranteed.

QAD Precision strongly recommends that customers migrate to GA Phase products as soon as possible in order to maintain the highest level of support for their applications and systems.

Note:- Refer to the retrofit policy to determine whether there are associated charges for providing fixes and/or enhancements to the version that your company has implemented

QAD GTTE Retrofit Policy
