

MMOG/LE Q-SCAN CONSULTATION

OBTAIN A LEVEL A CLASSIFICATION WITH QAD'S MMOG/LE Q-SCAN ASSESSMENT

Materials Management Operations Guideline/ Logistics Evaluation (MMOG/LE) is a comprehensive self-assessment required by many OEMs and Tier 1 suppliers throughout the automotive supply network. MMOG/LE is widely recognized throughout the industry as a standard for supply chain excellence and is a critical requirement for maintaining business and gaining new business.

WHAT IS AN MMOG/LE Q-SCAN ASSESSMENT?

The MMOG/LE Assessment, which QAD calls a Q-Scan, is a two-day consultation performed by QAD experts for organizations who want to increase operational performance, benchmark operations against best practices, or meet a customer requirement. The consultation prepares your company for internal or external audits and helps you benchmark your operations against industry best practices. The MMOG/LE Q-Scan also identifies operational gaps and recommends process improvements in order to attain Level A classification. An MMOG/LE Q-Scan ensures that:

- Level classification agrees with an internal or customer review
- Systems are fully automated to ensure customer and supplier orders are processed efficiently
- Customer requirements are accurately addressed

- Work instructions and assessment comments are properly documented
- Management understands the score, any gaps and action plans

WHY QAD?

QAD is the proven industry leader when it comes to understanding and supporting MMOG/LE and helping manufacturers achieve a Level A classification. QAD has been involved in the development of MMOG/LE for over 10 years. In fact, QAD is an AIAG/Odette designated trainer globally on MMOG/LE, and serves on the AIAG/Odette MMOG/LE workgroup. QAD has worked in collaboration with OEMs, supply chain experts and customers on the global MMOG/LE standard.

QAD built QAD Enterprise Applications specifically for the automotive industry, including support for MMOG/LE. With embedded functionality such as EDI and Web-based supplier communications, supply chain management, bar coding, release management, business process management and lean manufacturing, our solution not only ensures that your business aligns with industry best practices, it also helps align your organization with MMOG/LE global standards.

The QAD MMOG/LE Q-Scan will highlight ways to align your ERP solution with industry best practices, while helping you prepare to achieve a level A classification.

KEY BENEFITS OF AN MMOG/LE Q-SCAN

- Save time in preparing for and achieving Level A classification
- Uncover critical gaps which could result in a Level C score
- Ensure work instructions and criteria comments are accurately documented
- Make sure top management understands the score and any gaps
- Provides insight into your customers' and industry expectations

TYPICAL BUSINESS IMPROVEMENTS QAD CUSTOMERS ACHIEVED FROM AN MMOG/LE Q-SCAN

- Reduced inventory
- Reduced supplier premium freight
- Doubled sales without increasing staff
- Grew business without increasing inventory costs
- Increased available floor space
- Reduced scrap
- Eliminated spreadsheets and manual processes

Our approach to MMOG/LE has helped many organizations achieve their Level A classification and improve business processes. To learn more about our MMOG/LE Q-Scan or to schedule a consultation, [contact us](#) or read our [MMOG/LE overview brochure](#).
